

# BIOEMTECH

## 3<sup>rd</sup> PRECLINICAL MODELS IMAGING WORKSHOP

16 – 20 October 2023, Athens Greece

Once per year, in **BIOEMTECH CRO Laboratories**, we open up our doors and meet with the preclinical community, to **share methodologies, experiences & knowledge**. We welcome **renowned speakers** from the Academia & Industry and share our expertise in our **GLP preclinical laboratories**.

The main points covered during the **5-day Workshop** are the following:

- Multimodal *in vivo* imaging (SPECT/PET/CT/optical) & analysis
- Radiochemistry & radiation protection
- Targeted radioisotopic therapy
- Selected preclinical models: Breast cancer (4T1 & MDA-MB-231) and Gut fibrosis
- Animal handling & model development
- Legislation, ethics and SOPs
- Translational aspects and the route to the clinics
- **Hands-on** sessions on animal handling, radiochemistry, *in vivo* imaging and image post processing.

[Program & Registrations](#)

This year, the scientific program is enriched with a **leadership workshop** on team management, **mountain hiking** and **yoga morning classes** (optional sessions).

28 speakers from  
Academia & Industry

2 full days of hands-on  
sessions in our GLP Labs

3 new animal models  
each year

○ **Fees:** 800 € early-bird (until July 20th) | 950 € (after July 20th) | 750 € Student | 450 € Virtual
